

Angkor Handicraft Association
Product Catalogue: Wood Carving

Who We Are

Angkor Handicraft Association (AHA) is a not for profit business association that helps local artisans within Siem Reap province to regain their competitive advantage through Fair Trade.

AHA facilitates business opportunities to handicraft enterprises, linking artisans to local and international markets and providing business development services to rural producers.

Seal of Authenticity

To help identify authentic locally made products from machine made replicas and imported items, AHA has developed the Official Seal of Authenticity, available to Siem Reap based handicraft producers.

A variety of products currently bear the Seal including: silverware, stone art, bronze statues, bamboo furniture, bags and hand woven textile.

Ordering Cambodian wood carvings

Angkor Handicraft Association works with several producers and community groups around Siem Reap Province.

There are several variables that affect the production and consistency of wood items; raw materials, season and producer . We advice all buyers to get in touch with us to understand what the requirements and limitations are.

Wood carvings usually take between 3 and 10 days to finish depending on the size, style and complexity. Wood for large orders is bought as logs, reducing costs and providing a better consistency rate. For wholesale prices the minimum order required is 10 items.
